

INTEGRATION

Elogs CAFM+ Service Desk: An Integrated Approach

Unleash the Power of Integrated Platforms to Amplify Visibility, Turbocharge Productivity & Slash Risks.

As part of Marlowe Software, Risk, and Compliance (SRC), we understand the challenges organisations face when common data is required across multiple systems, leading to duplication, delay, and error. At Elogs, we have integrated our CAFM system with [Prosure360](#) and [Meridian](#) from our partners at [William Martin](#).

In doing this, we have combined three of the very best compliance systems, designed to make life easier for facilities and property managers. By integrating these three unique systems, we aim to give you unrivalled transparency and unparalleled control.

A graphic illustration on a blue and green background. At the top left, there's a white corner effect. Three circular icons are arranged horizontally: '360', a grid, and a speech bubble. Below them is a stylized cityscape with a tall building labeled 'SRC'. To the right is a large red play button icon. Below the play button is the text 'Integrated Platforms - Prosure360, Elogs and Meridian'. At the bottom, there are small icons of people and a dark bar with the text 'MARLOWE | Software, Risk & Compliance'.

What is Elogs CAFM+ Service Desk?

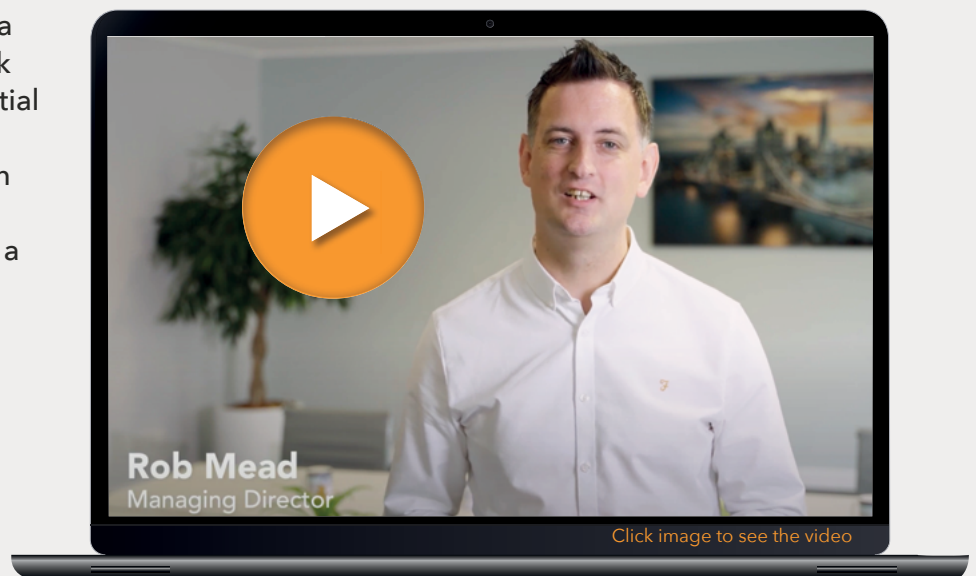

Property management through the power of people and technology

Elogs CAFM+ Service Desk is a cloud-based CAFM solution and branded Service Desk. Used across 22,000+ properties, we're instructed by the world's largest managing agents, property owners, and PLCs in the property and asset management sector. But Elogs CAFM+ Service Desk is more than just software; it acts as an extension of your team, providing seamless and efficient job management for property and facilities managers.

Our Computer Aided Facilities Management (CAFM) system is designed to alleviate the burden of job management and service coordination, freeing up valuable time for facilities managers to focus on strategic initiatives. Our Service Desk is a game-changer that sets us apart from our competitors. With round-the-clock support, our dedicated Service Desk team is on hand to ensure that every job is followed through to completion. We recognise the significance of 24/7 support, which is why we guarantee that assistance is readily available to you, day or night.

With Elogs CAFM, you'll also benefit from the full support of a contract manager, who will work with you to maximise the potential of the CAFM. The contract management team will establish relationships with both clients and service providers, ensuring a seamless and efficient process.

Ultimately, Elogs CAFM can simplify facilities management, helping you save time and cut costs. Elogs CAFM integrates seamlessly with our SRC Family products - Prosure360 and Meridian.

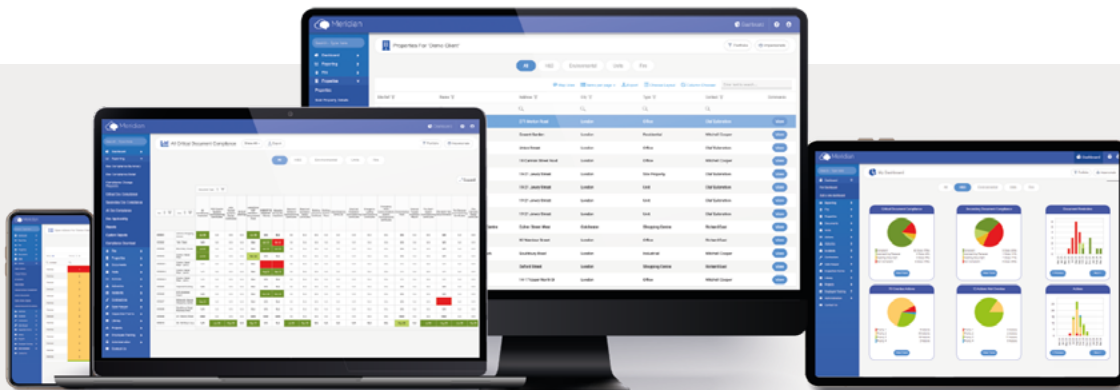

What is Prosure360?

Your entire supply chain all in one place

Prosure360 is a supply chain management platform that gives you total visibility of your suppliers and contractors. Our integration with this platform allows you to gain a comprehensive understanding of your supply chain by providing a traffic light report, enabling you to assess whether your contractors and suppliers meet your specific standards. This integration is a game-changer, as it will drive efficiencies and streamline operational processes across the supply chain, particularly in relation to supplier performance and selection.

The in-house assessors expertly navigate you through assessments such as Safety Schemes in Procurement (SSIP) and the Prosure360 Pre-Qualification Standard. These assessments cover vital domains such as business and professional standing, equality, diversity, people and quality management.

The integration between Elogs CAFM and Prosure360 reduces the administrative burden of managing your supply chain. The overall goal of Prosure360 is to empower businesses to make an informed choice about who they work with, ensuring the supply chain is made up of qualified, insured, and reliable contractors.

What is Meridian?

Our online compliance and risk management platform gives you total visibility.

Meridian is a state-of-the-art online risk management software that helps organisations better manage their compliance. Offering full visibility into your health and safety performance, this platform empowers you to cut costs, save time, and simplify compliance management.

With three packages to choose from, Meridian can be tailored to meet your specific business needs. The Enterprise package can integrate with other platforms to help you boost productivity, as well as offering a range of fully customisable modules.

Our integration with this unique software allows you to effectively track and monitor compliance across your property portfolio. Meridian is the ultimate compliance management system that enables you to reduce effort and the burden of managing compliance with disparate and multiple stand-alone processes.

How do each of these three systems work together?

Our integrated platforms offer a comprehensive 360-degree solution to meet all your compliance and facilities management needs. Any actions identified in risk assessments can be uploaded onto the Meridian platform. To find reliable suppliers and contractors to carry out these actions, you can search for Prosure360 verified suppliers within the Meridian platform. This means you can guarantee that your supply chain is made up of qualified and insured service providers who meet your specific business requirements.

Once you've found the right suppliers and contractors using the Prosure360 tab within the Meridian platform, the action is then pushed into Elogs CAFM as a job or quote request. Next, permits can be raised in Meridian, meaning the service provider is automatically given visibility of hazards before they attend the site. After the service provider picks up the job in Elogs CAFM, they visit the site to complete the job.

The service provider can then update Elogs CAFM, which automatically updates Meridian. Once the job is verified as done, the action can be closed in Meridian—so the cycle is complete.

What are the benefits of these integrations?

Our suite of integrated platforms aims to enhance visibility, increase productivity, and reduce risk. This integrated approach makes it easy to have full visibility of your buildings and assets, your supply chain, and your compliance activities. Ultimately, we want to create a compliance ecosystem that empowers our clients to mitigate risk, improve relationships with suppliers, and manage any number of sites or properties with ease.

Key benefits of our integrated approach:

- Improved cost savings.
- Better time-management.
- Increased efficiency across your business.
- Reduced risk across your property portfolio.
- Enhanced compliance activities.
- Improved property performance.
